I liked it actually. It's a good explanation of the 95% UCL, I'm just not sure how people ask that question outside of techy risk assessors. But kudos for her to write it up.

Thanks, Chuck. I see this a pretty narrow in scope (likely too narrow for use) but wanted to run it past you and Todd first.

Chuck,

Should have copied you on this too as it involves West Lake. See if you have any concerns with Terrie's fact sheet. Thanks,

Todd,

If you have a moment this week, please review Terrie's fact sheet to see if there is anything that warrants correction. She developed it for use on the Hudson River site and plans to provide it to the West Lake CAG to help with future Risk discussions. Note, we are meeting with the CAG technical committee next Monday, and she plans to provide it to them.

Thanks,

Subject: Fact sheet on 95% UCL

Hi Brad and Ben,

I hope the West Lake Landfill CAG meeting went well last week. I haven't received any information or requests from the CAG. Attached is a fact sheet that we prepared for another community where I will be discussing risk assessment. The WLL CAG technical committee asked us to write a fact sheet about risk assessment for them. As a precursor to that fact sheet, I am planning to give the attached to the CAG technical committee. If you see any problem with using the attached fact sheet for the WLL CAG, please let me know.

Is there a date for the next technical committee and/or CAG meeting?

Thanks.

Terrie
